V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)	Claims <u>1</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>NONE</u>	YES
	Claims <u>1</u>	NO
Industrial Applicability (IA)	Claims <u>1</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claim 1 lacks novelty under PCT Article 33(2) as being anticipated by Applicant's admission. Applicant admits, in specification, page-2, paragraphs-0002 and 0003, that a conventional magnetic label stock tape consisting a translucent supply tape having at least one major release surface and having longitudinal and transverse direction, and a plurality of magnetic labels, spaced in the longitudinal direction and being affixed to said release surface by means of pressure sensitive adhesive covering at least partial surface of the label facing the release surface. The tape has dimension in the transverse direction. Applicant also recites that typically the labels or the magnets on such supply tapes do not extend to the extreme edges of the tape. Hence, the tape extends beyond the edges of the magnet.

VIII. Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claim 1 is objected to under PCT Rule 66.2(a)(v) as lacking clarity under PCT Article 6 because claim 1 is indefinite for the following reason(s): As amended, claim 1 now recites in the preamble that the "tape extending beyond the magnets" while in the last two lines of the claim it recites that "said tape having a dimension in the transverse direction substantially equal to or extending beyond". It is unclear as to whether the tape is equal to or extends beyond the label or magnet transverse edges.
